

# DP SERIES - DISPLAY SOLUTIONS

Rotating Spigots

Three of the many configurations that can be made are shown here.

Order additional pieces to make even more complex or larger structures.

Our MOBILE SOLUTION is an all-in-one truss system designed with the flexibility to create a variety of displays and support configurations.

The patent pending Adjustable Support Bars with rotating spigots allow this system to connect at various angles without the need for custom corners!

The rotational spigot design makes set-up and tear-down easier and faster – ideal for mobile DJ's, tradeshow displays, special events, and many other applications.
